

Sustainable Bourne Valley (SBV) is a new community group set up with the aim of protecting our natural environment and promoting sustainable living in the Bourne Valley.

As our first project, we're hoping to transform a currently unused plot of land into a 'haven' for wildlife. Read more about this project below...

SMB Parish Council has kindly granted us permission to use a plot of land next to Hirst Copse in St Mary Bourne for this project. The illustrated plan below shows the planting we hope to carry out there which includes:

- Planting small trees to encourage woodland wildlife
- Planting wild flowers to attract bees, butterflies and other pollinators

Volunteers and children from the village school will be invited to get involved in the project to help create a colourful and vibrant habitat for wildlife that the whole community can enjoy.

If you're interested in getting involved please add your email address to the list below so that we can keep in touch or email us at:
SustainableBourneValley@gmail.com

Footpath 29

Gap in Fence

Key

① Meadow Planting:-

Primroses, Crocuses, Dog Tooth Violets, Meadow Buttercups, Clover, Ox-eye Daisy, Self heal, Red Campion, Wild Carrot, Cow Parsley, Tufted Vetch, Lesser Knapweed, Wild Daffodils
